

INTERLOCKING LEAD BRICK

The most shielding in the least amount of space.

Based on a tongue and groove design, our interlocking lead brick produces the most effective shielding in utilizing the smallest amount of space.

Ideal for adding additional shielding to existing therapy vaults or treatment rooms, the lead brick system can also be utilized in a freestanding lead room, such as an HDR Brachytherapy room to shield a full range of modalities. Modular bricks allow for easy installation or removal for relocation, even in difficult spaces. Our interlocking lead brick can also be used in new construction as an efficient method of reducing wall or ceiling thickness for optimal space.

FEATURES & HIGHLIGHTS

SPACE SAVINGS

Utilizes the least amount of space in shielding design

INTERLOCKING SHIELDING

Tongue and groove design allows for the most effective shielding solution

MODULARITY

Interlocking Lead Brick is easily installed and removed for relocation

FISCAL GAINS

Potential tax savings with capital equipment classification

REPURCHASING PROGRAM

Interlocking lead brick removal and repurchase programs available

TOP-LINE TECH SPECS

PRODUCT

Interlocking Lead Brick

USAGE

Low- and high-energy linear accelerator vaults, proton therapy, IMRT, HDR, Gamma Knife, CyberKnife, cobalt, nuclear medicine, industrial applications, custom radiation

DIMENSIONS

4"H x 12"W; Thickness in 3/4", 1", 1.5", 2"
(custom lengths available)

CONSTRUCTION

Solid cast lead, tongue and groove edges

DESIGN

Interlocking lead bricks are modular in design to maximize available space allocation (also available in square-edge bricks)

Recycled materials
used in this product
