

LEAD-LINED PLYWOOD

Lead-lined and custom-sized to fit any design.

Every sheet of NELCO plywood is laminated with defect-free lead to ensure shielding in PET/CT, HDR, diagnostic, therapeutic, and industrial modalities.

For use in either new construction or shielding upgrades, NELCO lead-lined plywood products are designed to fill the gaps between lead-lined gypsum wallboard and interlocking lead brick. Panels are 48" x 96" or cut to your specifications and uniformly lined with lead of a specified thickness. To prevent leakage, lead batten of equal thickness is supplied. NELCO experts will help determine your optimal size, thickness, and wall layout.

FEATURES & HIGHLIGHTS

VERSATILITY

Can be used in new or remodeled rooms

FLEXIBILITY

Dimensions and thicknesses to meet any design need

DELIVERY

Proven on-time deliveries from one of many facilities across the U.S.

INSTALLATION

NELCO installation teams are available upon request

TOP-LINE TECH SPECS

PRODUCT

Lead-lined plywood

USAGE

Shielding in PET/CT, HDR, diagnostic, therapeutic, and industrial modalities with custom applications

CONSTRUCTION

1/32" to 5/8" lead thickness, 1/8" to 3/4" plywood thickness

DIMENSIONS

48" x 96" standard; custom widths, height, and thicknesses available upon request
